

# ULEARN COURSE COPY

Instructors can course copy from a previously taught course into a new course. In order to copy course content in ulearn, an instructor **must be assigned** to both the source course and the destination course.

## Instructions

### Note:

Before proceeding, we recommend the setting up of [terms in ulearn](#). Terms are a way to view up to a year of past courses by terms or semesters.

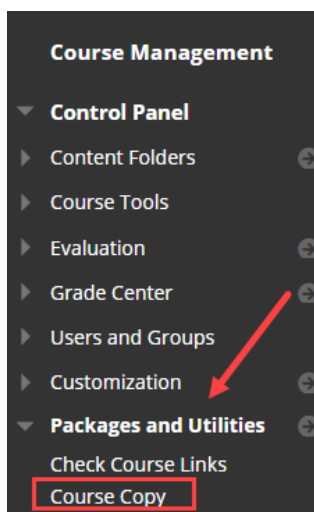

### Note:

All fully online courses are, and will continue to be, copied by the College of Professional Studies.

1. In ulearn, go into a **past course section** in which you need a course copy from. It is very important to select the correct past course or the wrong content will be copied into your new course section.

2. In the Course Management section of the ulearn course menu, expand the **Packages and Utilities** section and click **Course Copy**.

Course Copy process complete. [REDACTED]

The following Course Copy process has completed: Source Fall2018\_MATH2001\_PA\_11113\_DP | Destination Spring2019\_MATH2001\_PC\_31680\_DP  
The results of the process are shown below. Operation successful.

7. Repeat steps 1-6 for each course you need a course copy.

**Note:**

Since your course copy likely came with grade center columns you previously created, you will need to go into the grade center and delete two columns that came with the original course shell. These columns are located in the beginning of the grade center and are called: % Grade To Date and Total Points. Simply hover to the down arrow icon for the column name and choose Delete Column from the menu for those two columns.
