

LINK A WIKI

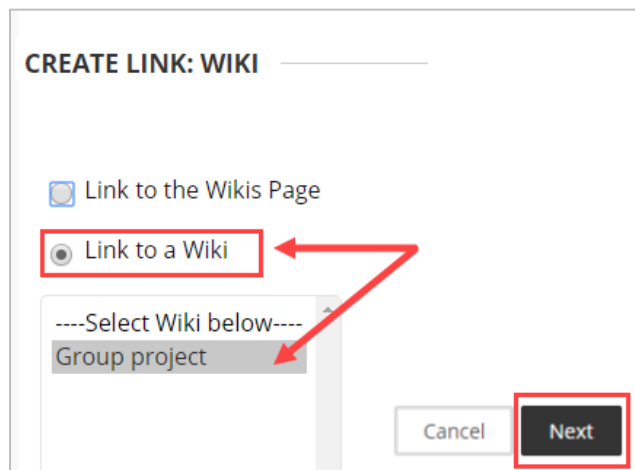

If an instructor [created a wiki](#) under Course Tools, students cannot see the wiki unless a link is created in a [content area](#) of the course (such as a weekly folder or other designated area on the left menu).

Instructions

1. Navigate to the content area or folder where you want to add a wiki. Hover over **Add Collaboration Tool** and then select **Wikis** from the menu.

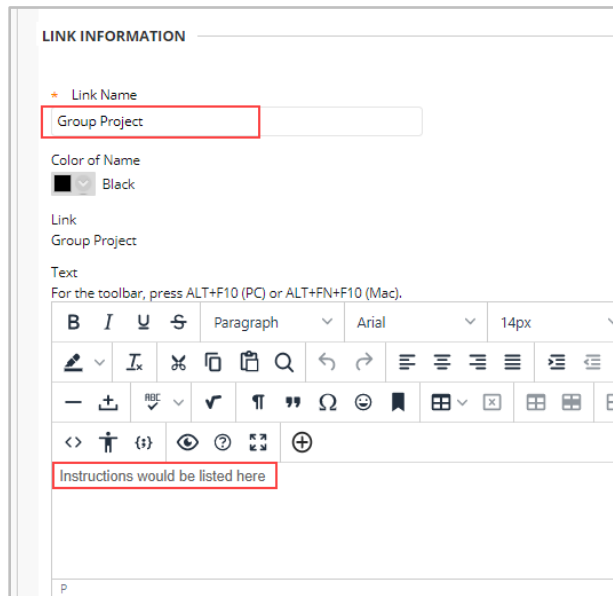

2. On the **Create Link: Wiki** page, select the radio button for Link to a Wiki. Click on the name of the wiki to add it to the content area and click **Next**.

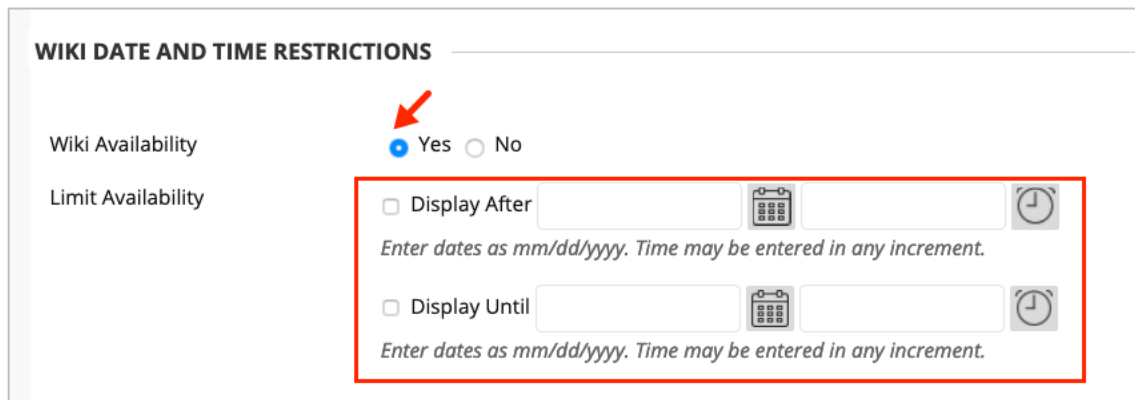

3. On the next page, the wiki name transfers over into the Link Name Text box. Re-enter the wiki instructions in the Text box.

LINK A WIKI

4. In the **Wiki Date and Time Restrictions** section, select the appropriate option for availability.

Note:

For the **Wiki Date and Time Restrictions** option to function correctly, you must select **Yes** for **Wiki Availability**.

5. When done, click **Submit**.
